

Rifles Made
For Total Control

Each point of contact
is fully independently adjustable
for a PERFECT fit to the shooter

Adopt a natural position for less/no pain and a longer more stable hold.

Optimum setup for any cant, all parts rotate around the barrel axis.

Sling

Independent of the handstop, and adjustable out from the barrel so that pressure on the hand can be reduced.

Support Hand

Independent handstop and handrest permit a natural hand position

Trigger Hand

Fully adjustable trigger mounted in a fully adjustable pistol grip, locate the grip to suit and the trigger will be there.

Breech

The breech can be positioned such that you do not disturb your position to load the rifle.

Cheekpiece

Fully adjustable on all axes, to ensure a comfortable head position.

Butt

Simply adjustable so it will mould itself and clamp to your shoulder.
